

EXECUTIVE SUMMARY

This document provides the third annual update to the comprehensive 2021 Community Assessment Update that focuses on the northern New Jersey communities where HOPES Community Action Partnership Incorporated (HOPES CAP, Inc.) provides various educational and socioeconomic empowerment services, including Hudson County, Somerset County, and the City of Plainfield in Union County. The purpose of this document is to provide a 2024 update to the comprehensive Community Assessment for the entirety of the organization's service area, as required of recipients of Head Start and Community Services Block Grant funding. All data provided is sourced from the United States Census Bureau's 2021 and 2022 American Community Survey (ACS), 5-Year Estimates, unless otherwise cited. As displayed in the data attached to this document, the Community Assessment compares 2021 ACS/2022 ACS data from the United States Census Bureau in order to measure and evaluate demographic, social, economic, and housing trends within the communities served by HOPES.

SUMMARY FINDINGS AND RECOMMENDATIONS

Observations

Note: The comprehensive 2021 Community Assessment compared data from the 2010 Census with the 2019 American Community Survey. Because of the lengthy 10-year time period between data sets, significant trends were easier to identify. This update compares 2021 ACS data with 2022 ACS data, and while Census statistics methods are helping in forecasting trends, the shorter time period presents some challenges in identifying trends on a larger scale. Therefore, the following observations seek to build on the original community assessment and identify where any notable increases, or decreases, provide insight that could or should impact service delivery decisions.

- **Demographic Characteristics of the Service Area**

Total Population: Population growth or decline was minimal, which is to be expected because of the short time period of data comparison (i.e., 2021 to 2022). However, there were some notable population increases in Harrison, Weehawken, Far Hills, Raritan, and Rocky Hill. These increases continue existing population increase trends, as Harrison and Weehawken were identified in the 2021 assessment as having fast growing populations.

Population Under 5: Notable increases in the population under 5 were observed in Bayonne, Guttenberg, Hoboken, North Bergen, Plainfield, Bound Brook, Raritan, and Somerville.

Hispanic/Latino Population: The Hispanic/Latino population grew notably in Secaucus, Branchburg, Franklin, Green Brook, Manville, Raritan, and Watchung, all of which have proportionally smaller Hispanic/Latino populations than other Hudson County towns with large and growing populations. Decreases were notable in East Newark, Harrison, and Kearny.

Black/African-American Population: The Black/African-American population grew notably in Harrison, North Bergen, Union City, West New York, Bedminster, Bridgewater, and Raritan. Decreases were notable in Jersey City, Weehawken, Bernards, Frankling, Hillsborough, and Manville.

Asian Population: The Asian population grew notably in Weehawken, Bound Brook, Branchburg, and Manville. Notable decreases were identified in Kearny, North Bergen, and Bernardsville.

- **Household Characteristics of the Service Area**

Two Parent Households with Children: The number and percent of households composed of two parents with children increased in notably in East Newark, Secaucus, Peapack Gladstone, and Raritan. Decreases were notable in Bayonne, Union City, and North Plainfield.

Single Parents: There were not notable increases in the number of single fathers. Notable decreases were identified in the majority of communities in the service area. The same trend is generally true for single mothers, with the exception of Bedminster, Bernardsville, Rocky Hill, South Bound Brook, and Watchung.

Grandparents Responsible for Grandchildren: There were not notable increases in the number of grandparents responsible for their grandchildren. Notable decreases were identified in Jersey City, North Bergen, Union City, Bridgewater, and Somerville.

Household Size: The average household size and family size is primarily decreasing across the service area, a trend that was observed in the 2021 Community Assessment.

- **Foreign-born Residents of the Service Area**

Foreign-born Population: The population of foreign-born residents increased notably in Hoboken, North Bergen, Secaucus, and West New York. The foreign-born population of many Somerset County towns is increasing, including in Bedminster, Branchburg, Frankling, North Plainfield, Peapack and Gladstone, Raritan, Somerville, and Watchung. Notable decreases were identified in Bayonne, Jersey City, Kearny, Union City, and Hillsborough.

Foreign-born Population without Citizenship: The population of foreign-born residents without citizenship increased in Secaucus, Bound Brook, Franklin, and Plainfield. Notable decreases were identified in Bayonne, Hoboken, Jersey City, Kearny, West New York, Bridgewater, and Warren.

Foreign-born Population by Year of Entry: Notable increases were identified in Jersey City, North Bergen, Secaucus, West New York, Plainfield, Bound Brook, Franklin, North Plainfield, and Somerville. Notable decreases were identified in Bayonne, Kearny, and Bridgewater.

Language Proficiency: The population with limited English proficiency increased notably in North Bergen, Secaucus, Union City, Plainfield, Bernards, and North Plainfield. Notable decreases were identified in Bayonne, Jersey City, and Warren.

- **Economic Characteristics of the Service Area**

Median Income: The median household income is increasing across the service area. Notably, the Median Family Income decreased in East Newark and Bedminster.

Per Capita Income: The per capita income is increasing across the service area.

Unemployment: The unemployment rate and number of individuals unemployed increased notably in Harrison, Kearny, North Bergen, Bound Brook, Millstone, and Watchung. Decreases were identified in most communities, most significantly in Bedminster, Bernards, Bernardsville, Branchburg, Far Hills, Montgomery, Peapack and Gladstone, and Somerville.

Public Assistance: The number and percent of residents receiving Supplemental Security Income is growing across the service area.

Poverty: The poverty rate is increasing most notably in East Newark, Guttenberg, Hoboken, Kearny, Bound Brook, Branchburg, Bridgewater, Hillsborough, North Plainfield, Peapack and Gladstone, South Bound Brook, and Warren. Decreases were notable in Secaucus, Bernards, Bernardsville, Far Hills, Franklin, Raritan, Somerville, and Watchung.

Childhood Poverty: The childhood poverty rate is mostly increasing across the service area, especially in Bayonne, East Newark, Hoboken, Kearny, Union City, Plainfield, Bedminster, Bernardsville, Bound Brook, Branchburg, Bridgewater, Hillsborough, Millstone, Raritan South Bound Brook, and Watchung.

Under 5 Poverty: The poverty rate for children under increased notably in Bayonne, East Newark, Guttenberg, Hoboken, North Bergen, Union City, Plainfield, Bound Brook, Branchburg, Bridgewater, and Franklin. Notable decreases were identified in Harrison, Secaucus, Weehawken, West New York, Montgomery, and Raritan.

Head Start Eligibility: The number of Head Start eligible children and families is increasing in many parts of the service area, with the exception of Harrison, Secaucus, Weehawken, West New York, Montgomery, North Plainfield, Raritan, and South Bound Brook, as well as several Somerset County towns that have (and continue to have) no eligible children and families.

- Education, Health, and Housing Characteristics of the Service Area

Adult Educational Attainment: The number and percent of adults without a high school diploma or equivalent is decreasing across much of the service area, while the number and percent of adults with secondary degrees is increasing. Exceptions were identified in Bayonne, Weehawken, West New York, Plainfield, Branchburg, Franklin, Hillsborough, Millstone, Montgomery, and Watchung, where the number and percent of adults without a high school diploma or equivalency has increased.

State-Funded Preschool: With the exception of Guttenberg and Secaucus, all Hudson County towns have state-funded preschool programs. Most towns in Somerset County do not, with the exception of Bound Brook, Franklin, Manville, North Plainfield, and Somerville, as well as Plainfield in Union County.

Health Insurance Coverage: The number and percent of residents without health insurance is decreasing, with the notable exception of Harrison, Bernards, Peapack and Gladstone, Rocky Hill, South Bound Brook, and Watchung.

Food Assistance: The number and percent of households receiving Supplemental Nutrition Assistance Program (SNAP) benefits is increasing across much of the service area.

Housing Costs: The median rent is increasing across the service area, with the exception of Green Brook, Millstone, Peapack and Gladstone, and South Bound Brook. Homelessness is also increasing across the service area.

Recommendations

The following recommendations were included in the 2023 Community Assessment Updates. They are preserved here in their entirety, with updates and notes added:

Expand Recruitment in Nontraditional Service Areas: In the 2022 assessment update, it was noted that most Somerset County households in need were concentrated in a small number of communities, including Bound Brook, Franklin, North Plainfield, and South Bound Brook, and to a lesser extent, Hillsborough, and Manville. Data from the 2023 update now fully confirms Hillsborough and Manville as areas of high need, and include communities such as Branchburg, Green Brook, and Warren as places to advertise services. Also, communities such as Far Hills, Peapack and Gladstone, and Rocky Hill, are reversing trend and seemingly welcoming in a more affluent population. While need throughout Hudson County and Plainfield is well pronounced, however, there are significant demographic shifts occurring in Somerset County, and HOPES should work to identify families in need, particularly households with immigrants, limited English proficiency, lack of citizenship, low educational attainment, and/or other indicators. It would be beneficial to continue to review outreach strategies to identify gaps in the ability to connect with these communities and locate families in need. This is especially true as assessment data shows rising unemployment, rising rents, and other economic indicators that portend a higher level of need in the coming years.

- **Update:** New data from the American Community Survey confirms that these trends are continuing. Somerset County is seeing an increase in foreign-born residents, including foreign-born residents without Citizenship and individuals with limited English proficiency. About 75% of new Somerset County residents with limited English proficiency identify Spanish as their primary language. This trend suggests HOPES should review existing programs, services, outreach methods, strategic partnerships, and other operational strategies to ensure that the high quality of services offered in Hudson County and Plainfield is fully expanded to Somerset County and able to address the needs of a growing immigrant and limited English proficient population.

Don't Overlook the Traditional Service Areas: Although there are areas of growing need, especially in Somerset County, the traditional target areas of Bound Brook, Franklin, Hillsborough, Manville, North Plainfield, and South Bound Brook have a significant and growing need for support, particularly among low-income, immigrant, and/or limited English proficient communities. The 2023 assessment data also shows rising need in two traditional service areas: Hoboken and Plainfield. In these communities, there are more immigrants, limited English proficient and/or minority households, single parents, grandparents responsible for their grandchildren, and other indicators of growing need for families of young children. HOPES should review outreach strategies in these primary service areas to identify new methods for locating families in need.

- **Update:** There are several indicators that demonstrate the importance of continuing to provide, review, analyze, and expand high quality service delivery in traditional areas in Hudson County and Plainfield. Childhood poverty is rising, as are rents, while per capita and median incomes rise. This indicates that low-income families will increasingly be priced out of communities and should be engaged and supported with services that allow them to maintain their roots in their community. Harrison is a good example of this. Significant development has attracted higher socioeconomic status households, a more diverse population, and a reduction in metrics that demonstrate economic need, such as Head Start eligibility.

Assess Capabilities to Connect with Immigrant Populations: There is a growing number of foreign-born residents, foreign-born residents without citizenship, and residents with limited English proficiency throughout the service area. This trend originated with the 2021 assessment, was continued in the 2022 update, and remains a prominent theme of the data with this 2023 update. The majority of these individuals originate from Latin American or Asian nations. HOPES should review staffing levels and capabilities to provide services to these populations, including bilingual individuals that are representative of the languages spoken by these immigrant populations newly arrived in the United

States. One interesting anomaly to the data is Secaucus, where there are more than 1,000 new foreign-born residents from 2020 to 2021, and the percent of the population composed of foreign-born residents increased by 9.8% during that time, along with more than 400 new residents with limited English proficiency, a 17.7% increase. However, the number and percentage of residents with limited English proficiency who identify Spanish as their primary language declined in Secaucus, suggesting a different immigrant population is settling there. These anomalies likely exist elsewhere in the service area, and demonstrate that HOPES must be able to incorporate new services for different populations, including as population compositions shift from year to year.

- **Update:** Immigration continues to impact demographic trends across the service area. There was a net gain of foreign-born residents of the service area of 496 people. This includes 1,355 new immigrant residents of Somerset County and 1,208 new immigrant residents of Plainfield. While there was a net decrease of 2,067 foreign-born residents in Hudson County, a total of 5,265 new immigrants settled in Hudson County from levels identified in the 2021 data and 2022 data. Immigration “hot spots” include Hoboken (+200), North Bergen (+222), Secaucus (+916), West New York (+204), Bedminster (+200), Branchburg (+215), Franklin (+1,063), North Plainfield (+178), Peapack and Gladstone (+138), Raritan (+171), Somerville (+215), and Watchung (+205).

Develop New Partnerships to Target New Populations: To connect with these new target populations, HOPES should review its existing partnerships and identify new partners that can help facilitate outreach activities. Cultural and ethnic-specific groups, municipal governments, and other local organizations are ideal partners in spreading the word about HOPES programs and services and deepening its connections to the service area. This recommendation was made in the 2021 assessment and 2022 update, and continues to apply as the need for services is growing across the service area, especially among minority, immigrant, and/or limited English proficient populations.

- **Update:** As previously suggested, HOPES should review existing programs, services, outreach methods, strategic partnerships, and other operational strategies to ensure that the organization is positioned to offer a high quality of services to communities in need.

NEW – Monitor Trends in Household Size: Across the service area, the average household size is decreasing. Also, while the total number of two parent households with children increased slightly, the percent of households composed of two parents with children decreased by 1.5%. This is a trend to monitor moving forward, as it mirrors national and global population decline trends and also has long-term implications for service delivery.

Survey Results

- Hoboken Housing Authority

As a recipient of Resident Opportunity and Self-Sufficiency (ROSS) funding from the US Department of Housing and Urban Development, HOPES is required to conduct an annual survey of public housing residents. The results of the survey are used to prioritize three core services from a menu of service options. HOPES provides ROSS-funded social services to residents of the Hoboken Housing Authority (HHA), and the results of the 2024 survey of HHA residents are summarized below. While the survey only focuses on housing authority residents, the low-income and predominantly Hispanic/Latino resident population of the HHA is helpful in understanding the needs of HOPES service area, as HOPES primarily serves low-income Hispanic/Latino communities.

The survey of HHA residents identified significant financial, employment, and healthcare challenges among low-income, public housing residents. Key issues and service area needs identified by respondents include:

- High Cost of Living
- Financial Insecurity
- Job Availability
- Financial Counseling
- Mental Health
- Physical Health
- Access to Education
- Elderly Living Assistance
- Digital Literacy
- Childcare

Barriers to employment were a major concern, with respondents citing transportation, lack of job training, limited job opportunities, and the need for affordable childcare as the most significant obstacles to employment and upward mobility. Related to these challenges, respondents expressed a desire for support through vocational training, digital literacy, career advancement opportunities, and increasing income.

Healthcare needs were also prominent in survey responses, with access to healthcare, dental care, and mental health insurance and providers identified as priorities. Stress management and preventative health programs were highlighted as critically needed services. Of additional note, approximately half of the households surveyed reported having at least one member with a mental or physical disability, highlighting the importance of accessible services.

In summary, the survey results reflect a community facing various economic, educational, and healthcare challenges. These needs are further examined in the data tables that follow, which utilize US Census data to support deeper analysis on community needs at the county and municipal levels.

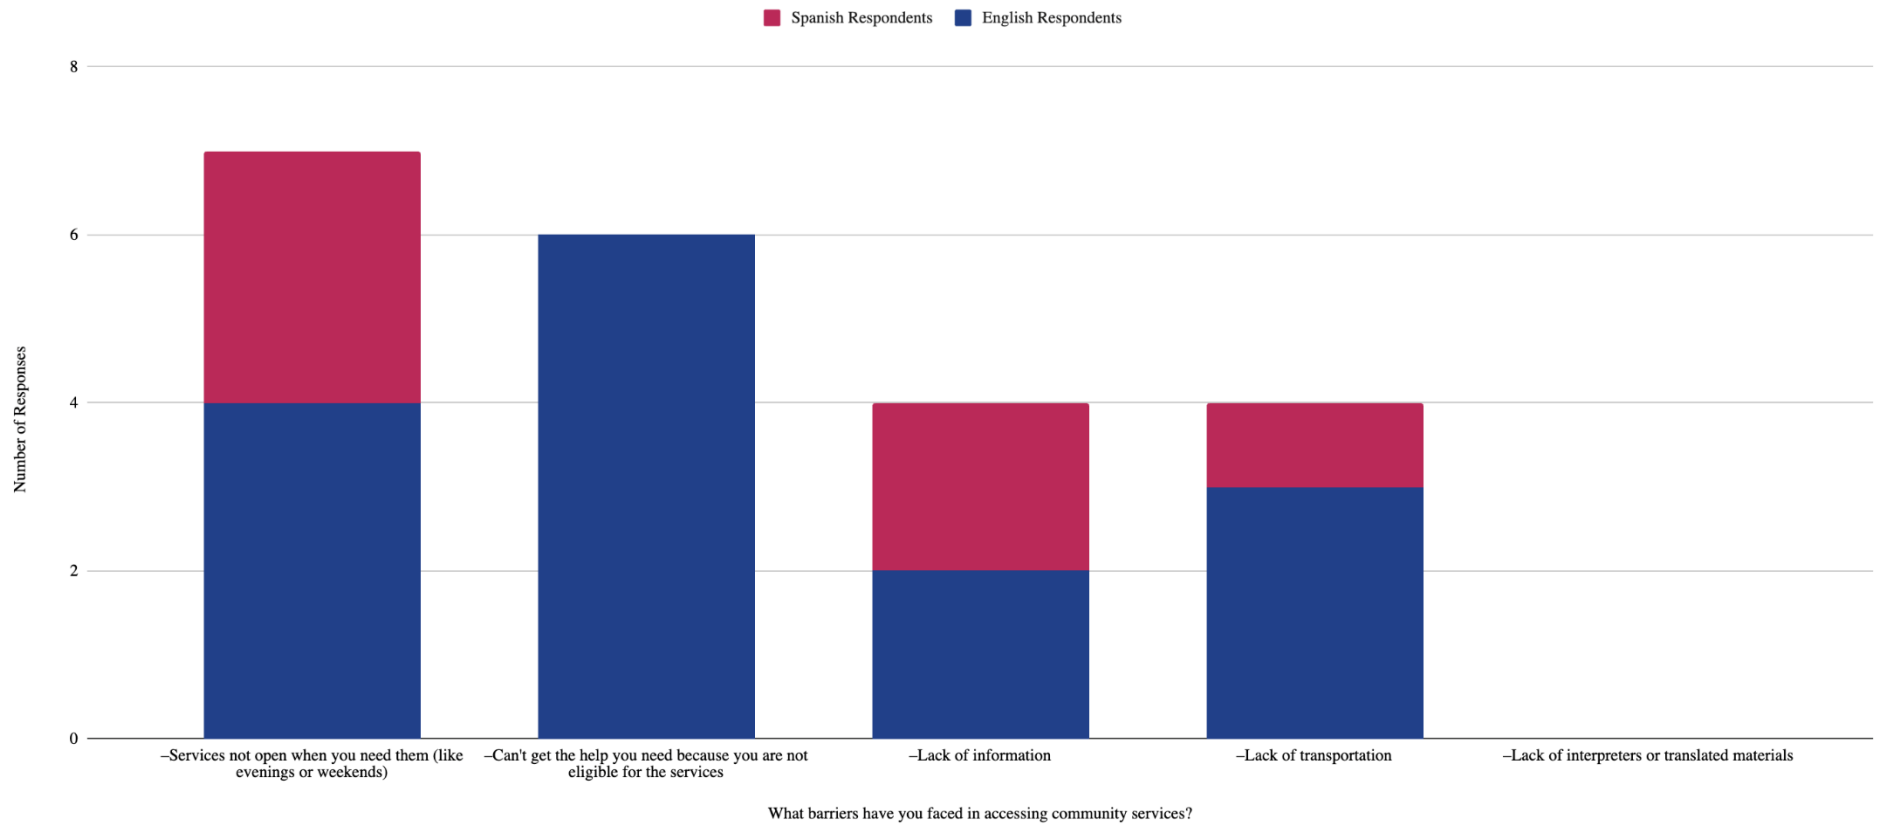

- HOPES Comprehensive Survey

In addition, HOPES recently completed a survey of clients and partner organizations. Summarized results include:

- Barriers to Accessing Community Services: Operating hours (esp. nights and weekends), eligibility, limited information, and transportation were identified as barriers.
- Challenges in Accessing Everyday Needs: Finding employment, childcare, transportation, information, healthcare, and connection and safety were identified.
- Community Services and Programs by Need: In order – preschool education, housing/rent assistance, center-based childcare, utility bill assistance, youth programs/college prep, healthcare, adult education, financial literacy, tax preparation assistance.

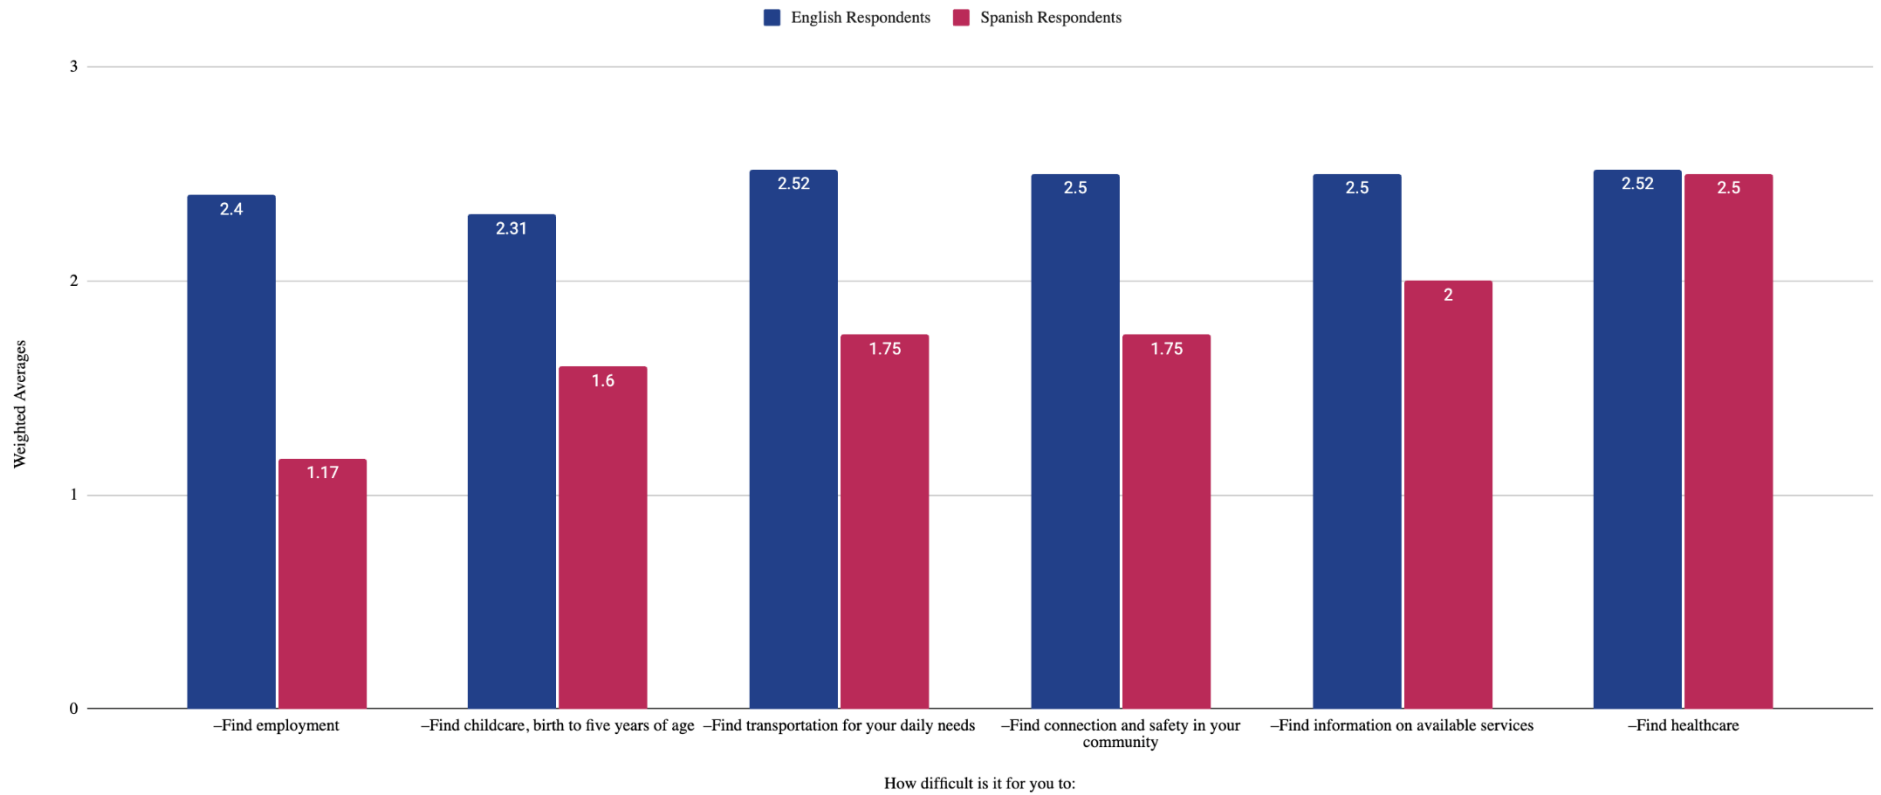

Charts showing the results are included on the next page:

Barriers to Accessing Community Services

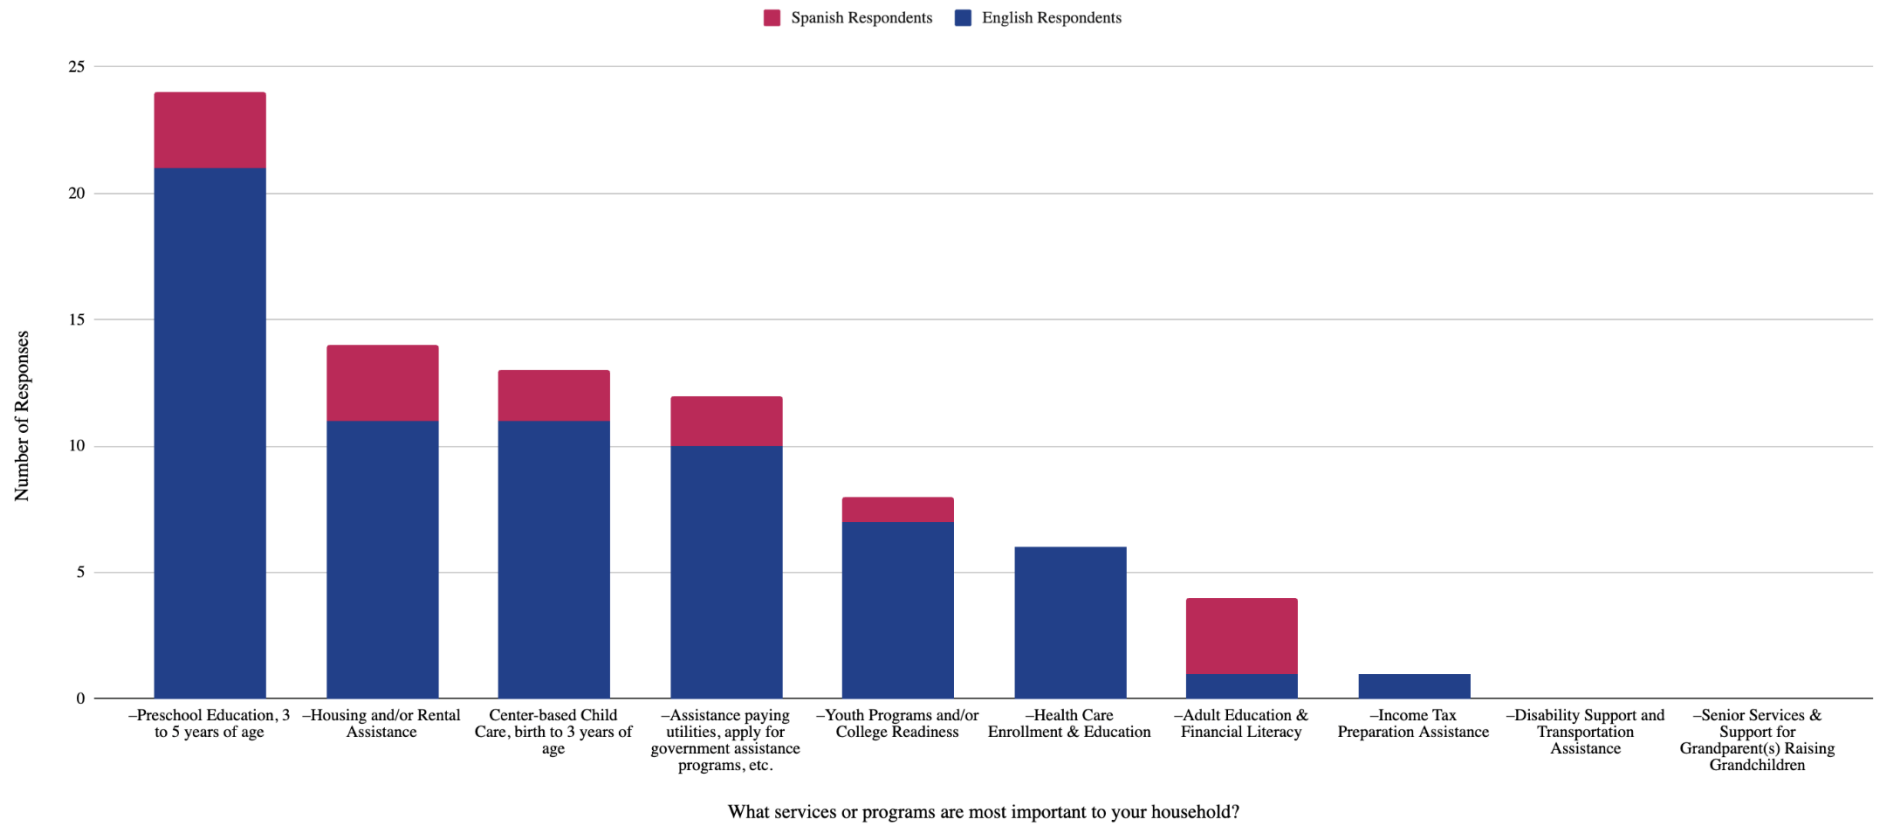

Challenges in Accessing Everyday Needs

These are weighted averages. A value closer to 1 indicates higher difficulty, while a value of 2 is moderate, and a value of 3 suggests ease of access.

Community Services and Programs by Need

Demographic Characteristics: Population and Related Trends

- Total Population

Table 1 includes total population counts for 2021 and 2022 as well as the change in total population and the percent change in total population.

Table 1. Total Population – 2021 to 2022 Comparison				
Municipality	2021	2022	Change	% Change

- Disability Status

Tables 68-71 show the total population and percent of the population with a disability in 2021 and 2022, as well as the total change and percent change between 2021 and 2022, including for three age brackets: under 18, 18 to 64, and 65 and over.

Table 68. Disability Status - 2021								
Municipality	Total with Disability	% with Disability	Under 18 with Disability	% Under 18 with Disability	18 to 64 with Disability	% 18 to 64 with Disability	65 and Over with Disability	Percent 65 and Over with Disability

- Gross Rent as a Percentage of Income

Table 74 shows the number and percent of households where the rent paid exceeds 30% of household income in 2021 and 2022, as well as the total change and percent change over the past year. GRAPI is a technical term for “house poor,” and the higher the concentration of households exceeding 30% GRAPI, the greater need for supportive services or more affordable housing.

Table 74. Gross Rent as a Percentage of Income
